If the VGA or HDMI does not get any signal, it will go into stand-by after two minutes. If there is no input on the AV, it will go into stand-by mode after 10 minutes.

#### **BASIC OPERATIONS**

#### TURNING THE CTOUCH INTERACTIVE DISPLAY ON OR OFF

- 1. Plug the power cord into an AC power outlet.
- 2. Press the Power Switch on the CTOUCH interactive display.
- 3. Now the CTOUCH is in standby mode. Wait a moment until the power indicator lights up, then press 0 button to turn on the CTOUCH interactive display.

#### IN CASE OF FIRST TIME INSTALLATION

a. Select the desidered menu language, then press START and go to the next page.

b. Select location and go to the next page.

• Make sure that all plugs are securely inserted into the sockets. Loose connections can result in image, colour or sound problems.

• Before using headphones, adjust the device volume to avoid excessive volume, as hearing damage may result.

Connect PC with VGA, DP or HDMI cable. Please choose the proper method of connection based on your device.

• This product should be operated only from the type of power source indicated on the marking label.

Always unplug the AC cord from power outlet when you won't use the screen for a long period of time.

4. Press 0 button again to turn the CTOUCH interactive display into stand-by mode.

When connecting an external device to the CTOUCH interactive display, make

• The illustration of the external device may be different depending on your model.

The CTOUCH interactive display is designed with multiple USB port (3.0 or 2.0), if you

plugging them into the sockets on the CTOUCH interactive display.

want to connect a USB device, please select the appropriate port.

• Check the plugs at the end of the cables to make sure that they are of proper type before

sure that the CTOUCH and external device are turned off.

Refer to the operating manual of the external device as well.

Connect TOUCH OUT with USB cable to PC USB port.

5. To cut off the power completely, use the Power Switch.
