CTOUCH®

PACKING CHECKLIST

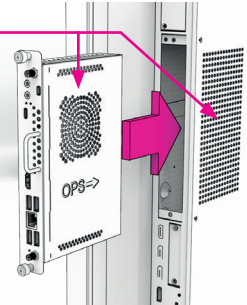

1 x OPS PC Module

2 x Wifi/BT Antenna

INSTALL OPS PC MODULE

STEPS

1. **Disconnect** the display from mains **power**.

2. Insert the OPS into the OPS slot. Make sure the **arrow labelled 'front'** points to the front of the display. In this orientation the **vent holes** of the OPS PC is facing vent holes of the display.

3. **Reconnect** the mains **power** to the display.

4. If the display doesn't automatically restart after reconnecting the power, turn on both the display and OPS PC manually. Look for the ⏻-icon on the OPS PC.

5. Select OPS/PC as **input source** on the display.

CAUTION!

Incorrect insertion can result in a defective OPS PC or display.

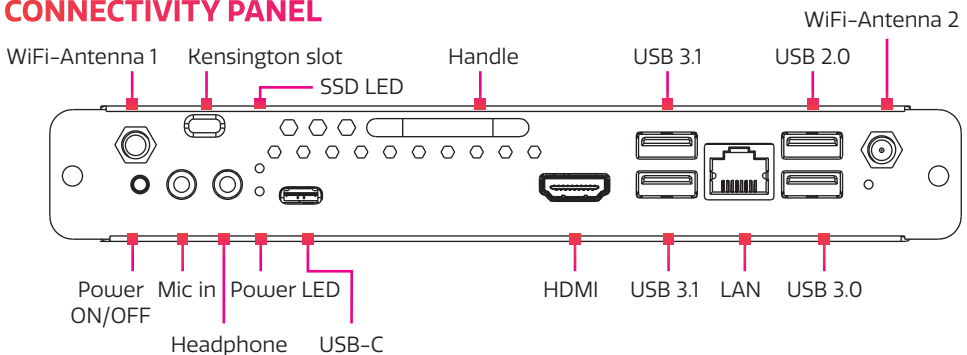

⏻ For both **inserting** and **removing** the OPS, make sure to **disconnect the power** before doing so. (See step 1)

▦ Most CTOUCH displays provide the OPS PC with LAN if there is an **existing LAN connection** to the display.
