

ESHARE WIRELESS SCREEN SHARING
CTOUCH RIVA

DARE TO ESHARE

EShare is a super easy wireless screen sharing application pre-installed on the CTOUCH Riva. The user interaction is natural, enjoyable and perfectly suited for educational and business presentations. You can start sharing wirelessly easier than ever before.

Share, inspire, have fun!
With CTOUCH by your side.

CTOUCH[®]

ESHARE WIRELESS SCREEN SHARING

CTOUCH RIVA

✓ **Wireless screen sharing and more!**

With the pre-installed application EShare you are all set for increasing the interaction between the presenter and your audience. You can start sharing wirelessly easier than ever before. EShare allows you to mirror the screen of your PC, Mac, Chromebook, tablet or mobile device onto the CTOUCH Riva. But also, the other way around; share the content from the CTOUCH Riva to your personal device. But that is not all! If you install the EShare application on your personal device you are also able to control the CTOUCH Riva display, make annotations, take screenshots and much more. AirPlay and Chromecast are also supported natively.

✓ **Getting started**

In order to start your session, you need to install the EShare application on your personal device. Once you installed the application you just need to do three things; be in the same network, find the device and start sharing.

✓ **Unlimited screen mirroring with EShare Licence**

With the pre-installed EShare application you can stream for 5-minutes per session. After 5 minutes, the session will be ended automatically. After the session is ended you can start a new session immediately. If you do not want to have any time limitations, you can buy the CTOUCH Riva EShare Licence, taking away the 5-minute streaming limitation per session.

✓ **The EShare benefits at a glance**

- Two-way-touch: touch functionality works both ways.
- Stream and view up to 9 devices at the same time.
- Share the content from your devices to the screen, and vice versa.
- Take control over your display; two-way touch, an annotation tool & a screenshot function.
- Up to 50 users in one session: switch easily between devices.
- Works on all mainstream operating systems, like: Android, Chrome, iOS, macOS and Windows.
- AirPlay and Chromecast are supported natively.

✓ **Overview of supported functions per OS**

OS	TYPE	MIRROR TO THE DISPLAY	SOUND	TOUCH	MULTIVIEW	MIRROR FROM THE DISPLAY
